# New England Archivists

---

*Bringing Together  
the Guardians of  
New England's Heritage*

---

**f**ounded in 1972, New England Archivists (NEA) is a non-profit organization of people who organize, preserve, and provide access to historical records in a variety of formats. It offers educational opportunities and provides venues for archivists to gather and share experiences with colleagues. NEA is committed to increasing public awareness of the importance of archival work in preserving New England's historic and cultural heritage.

As of 2004, NEA consists of over five hundred archivists, curators, records managers, librarians, allied professionals, and students who work with archival, manuscript, and other special collections. The organization is open to those with an interest in archives, such as historians, researchers, and genealogists.

For more information, please see our web site:
